PROFILE

Creative and Detail-oriented Web Developer with 3+ years of experience in designing, developing, and maintaining dynamic websites and web applications. Proficient in a range of technologies including HTML, CSS, JavaScript, ReactJS, PHP and more. Adept at collaborating with cross-functional teams to deliver user-centric solutions that drive engagement and achieve business goals. Strong problem-solving skills with a focus on creating optimized, responsive, and scalable web solutions.

WORK EXPERIENCE

React.js developer
Cranesbill Tradelink Pvt Ltd   01/2023 - 07/2025

- Website and Application Development: Designed, developed, and maintained responsive and interactive websites and web applications using modern technologies, including HTML, CSS, JavaScript, and front-end framework (React).

- User Interface (UI) and User Experience (UX) Design: Collaborated with UX/UI designers to create user-centric interfaces, optimizing navigation, layout, and visual appeal for a seamless and engaging user experience.

- Performance Optimization: Applied best practices to improve website performance, including code minification, lazy loading, and caching techniques, resulting in faster load times and enhanced user satisfaction.

- Troubleshooting and Debugging: Identified, diagnosed, and resolved technical issues and bugs, ensuring high-quality and reliable web applications through thorough testing and debugging processes.

- Version Control and Collaboration: Managed codebase and tracked changes using Git and GitHub, facilitating collaboration with team members, handling merge conflicts, and maintaining a well-documented project history.

- Project Management and Coordination: Worked closely with project managers, stakeholders, and other developers to gather requirements, define project scope, adhere to timelines, and deliver effective web solutions on schedule..

Laravel Developer
Dignitysoft Private Limited   07/2021 -12/2022

- Application Development: Developed and maintained robust web applications using the Laravel framework, ensuring scalable, maintainable, and high-performance solutions.
- MVC Architecture: Implemented Model-View-Controller (MVC) architecture to separate application logic from user interface and data layers, promoting organized and reusable code.
- Database Management: Designed and managed relational databases using Laravel's Eloquent ORM for efficient data handling, migration, and schema management.
- API Integration: Created and consumed RESTful APIs to integrate third-party services and facilitate data exchange between the backend and frontend components.
- Authentication and Authorization: Implemented secure user authentication and authorization mechanisms using Laravel's built-in features, ensuring data protection and access control.

PROJECTS

- Anergy. in

 Developed a new admin panel, which improved internal operating efficiency by over.

- N5 Solution

https://www.n5llc.com/ N5 this is currently in progress with the solution's admin panel and work on the website dynamic. This Company Grows Bussiness Ideas.

- Directorate of Economics and Statistics

https://data.desagri.gov.in/login This portal website is based on 6 modules. It has different roles for different logins. This is a government Project. It's built on Laravel 8.

- Myindiacompany

https://myindiancompany.com/ This is a service project that has different types of services like cooking, deep cleaning.,babysitting, homemade, etc.

- B-byte

https://www.bbyteadmin.com/loginTh is is the admin panel for the b-byte app. Or there was an app that looked like Instagram and I worked on its admin panel.

- Smartrisers
https://www.smartrisers.com/
This is information about Bytes App like Privacy Policy , Terms & Conditions

- Performance Optimization: Applied optimization techniques such as query optimization, caching, and asset management to improve application performance and reduce load times.
- Testing and Debugging: Conducted thorough testing and debugging of applications using Laravel's testing tools and PHPUnit to identify and resolve issues, ensuring reliable and error-free code.
- Version Control and Collaboration: Utilized Git for version control, managing code changes, collaborating with team members, and maintaining project history effectively.
- Documentation and Maintenance: Created and maintained comprehensive documentation for code, development processes, and application features to facilitate future maintenance and enhancements.Website and Application Development: Designed, developed, and maintained responsive and interactive websites and web applications using modern technologies, including HTML, CSS, JavaScript, and front-end framework (React).

- User Interface (UI) and User Experience (UX) Design: Collaborated with UX/UI designers to create user-centric interfaces, optimizing navigation, layout, and visual appeal for a seamless and engaging user experience.

- Performance Optimization: Applied best practices to improve website performance, including code minification, lazy loading, and caching techniques, resulting in faster load times and enhanced user satisfaction.
